

Direct Install Letter

May 2019

Small Businesses Can Receive No-Cost Energy-Saving Products and Installation from SCE

Southern California Edison (SCE) is pleased to announce that the Direct Install program will be coming to your area to offer energy-efficient equipment installed at no-cost to you. If you are a qualified business owner with a peak demand of less than 100 kilowatts of electricity per month, and you are seeking new ways to reduce expenses and cut operational costs, then this offer may be right for you.

The Direct Install program is quick and easy. First, an SCE-approved contracted vendor and energy expert will be in your area to give you advice and help you get started. The vendor will conduct a simple energy survey of your facility at **no-cost to you**.

After completing the energy assessment, the contractor will make recommendations to improve the energy efficiency of your business. If you agree with the recommendations, if any, the contractor will ask you to sign an Authorization Form and schedule an appointment, at your convenience, to install the equipment. Installation of recommended energy-efficient equipment is fast and efficient and should not interrupt your business operations.

So when an SCE-approved energy expert visits your neighborhood, be sure to take advantage of this great opportunity to discuss your options and learn more about the Direct Install program.

For more information on this program, please call Michele Myers-Heard at (909)942-8496 or visit michele.myersheard@sce.com.

** The Direct Install program is funded by California utility ratepayers and is administered by Southern California Edison under the auspices of the California Public Utilities Commission. The Direct Install program is available to qualified businesses using less than 200 kilowatts (kW) monthly. Corporately-owned national franchises are not eligible. Installed equipment is warranted by the manufacturer for one year and the contractor warranties their work for one year. Projects are limited to a maximum of \$10,000 per Service Account for accounts with demands of 0-99 kW, and \$15,000 per Service Account for accounts with demands of 100-199 kW. Program effective until funds are exhausted. Program may be modified or terminated without prior notice*
