average slope of greater than 20 percent. Further, the project does not result in any changes in land use or density, as no new structural development is proposed, and does not result in the creation of any new parcel.

Moreover, none of the exceptions to the categorical exemptions set forth in State CEQA Guidelines section 15300.2 apply to the project. The exception set forth in State CEQA Guidelines section 15300.2(a), Location Class 11 are qualified by consideration of where the project is to be located. The proposed project is not located in or will have an impact on an environmental resource of critical concern that is designated, precisely mapped, or officially adopted pursuant to law by federal, state, or local agencies given its location and the nature of the site. Section 15300.2(b)'s exception, relating to cumulative impacts, does not apply as there are no other successive projects of the same type in the same place that could result in significant cumulative impacts. Section 15300.2(c)'s exception does not apply because there are no "unusual circumstances" that apply to the project; minor LLAs are not unusual. Section 15300.2(d)'s exception does not apply because the project is not located near any scenic highways. Section 15300.2(e)'s exception does not apply because the project site does not contain hazardous waste and is not on any list compiled pursuant to Section 65962.5 of the Government Code. Finally, Section 15300.2(f)'s exception does not apply because the project has no potential to cause a substantial adverse change in the significance of a historical resource. Additionally, the project site does not contain any identified significant cultural resources and the project does not include any grading.

Consistent with the requirements of the Class 5 exemption and pursuant to CEQA Guidelines §15300.2, Exceptions to the Exemption, the entirety of the project falls within the Class 5 Exemption set forth in State CEQA Guidelines Section 15305.
